Within a short distance of Nueva

Gerona, and convenient for travelers | Haley via launch or automobile is the new East Gerona Beach which is about to be opened by persons interested in the development of this end of the island. The location is ideal for a days outing, being about a mile and half from the capital city and situated on high ground to windward of the river. It is therefore protected from the insects by trade winds which constantly sweep the shore and drive them from instead of toward it. Arrangements have been completed by the Burnside Hotel management for the construction of a wharf and suitable landing place and work on these conveniences will soon be under way. Plans for the organization of launch and driving parties are under consideration by several different persons and it is the hope of those interested to make this resort the principal rendevouz for picnic and excursion parties. #### CHILDREN ENTERTAIN AT YULE-TIDE HOUR

On Christmas eve the children of the Union Church Sunday School of Nueva Gerona entertained their parents and others in the church building with songs and recitations. The large auditorium was crowded to its capacity and a great number were compelled to stand outside where they viewed the exercises through windows and doors. The rostrum was made attractive with holiday decorations and two hig Christmas trees stood in the corners at the back of the platform. On a table in the centre were arranged the various packages which were to make the hearts of the youngsters glad and the manner in which they helped to make the affair a success reflects credit upon them. #### WELCOME 1913, ADIOS 1912

The dawn of 1913 is at hand and the few dying embers of one of the most eventful years in the history of the gray old world. During the past twelve months some of the most remarkable discoveries have been made and science has profited in a marked degree. It has been a year of great prosperity particularly in the United States. Wars and revolutions have played their part and some of the greatest disasters that the world has ever known have saddened mankind. will ever be known as settlers has been greater than during any virtuous degree. previous year; they have prospered to the full measure: contentment has reigned on the world. The recent heavy shipments of garden truck and citrus fruits to the markets of the United States are worthy of comment. More produce went north last week than during any other in the island's history, all of which shows that the groves and gardens of the output of the previous ear.

We are surely blessed with a glorious climate and this fact is not denied by our \$2.00 most ardent knockers.
